

Equipment specifications

This document shows the collective schemes' presentation of their collection equipment at the municipal collection sites.

Boxes

Fraction 5: Light sources

Application

This box is used for straight light sources longer than 60 cm.

Shorter light sources including energy-saving bulbs may be collected in drums (latch closure) (see also below).

Technical specifications

- Measurements: approximately 195 x 80 cm – Height 115 cm.
- The container has hatches on the side and at the top; they open in two positions
- Material: metal
- Steel legs

Drums (latch closure)

Fraction 5: Light sources and Fraction Batteries: Batteries

Application

This drum is used for the collection of light sources and batteries corresponding to Fraction 5 and Fraction batteries.

Technical specifications

- Plastic drums (latch closure)
- Volume: 120 litres for batteries (ø 50 cm, h 80 cm), 200 litres for light sources (ø 60 cm, h 100 cm)
- Loose lid. Place the lid after filling of waste to prevent water from entering the drum.
